CURRICULUM VITAE

JOSHUA NDEULE

Full-Stack Developer | BSc ICT | Cybersecurity and AI Enthusiast

0882 065 532 • 0991 210 903 • joshndule@gmail.com

Portfolio: joshuandeule.netlify.app GitHub: github.com/joshndeule

PERSONAL INFORMATION

Date of Birth	23rd November 2003
Place of Birth	Ntcheu Hospital
Sex	Male
Address	Mzuzu University, Private Bag 201, Luwinga, Mzuzu 2
Nationality	Malawian
District	Ntcheu
Marital Status	Single
Languages	English and Chichewa
Contact	0882 065 532, 0991 210 903
Email	joshndule@gmail.com

PROFILE

A motivated Bachelor of Science in Information and Communication Technology (BICT) student with a strong foundation in full-stack development, microservice architecture and secure system design. Currently a Full-Stack Developer Intern at Infi-Tech, building scalable SaaS platforms, REST APIs, and web and mobile applications with Next.js, NestJS, PostgreSQL, Prisma and Docker. Passionate about cybersecurity, artificial intelligence and networking, and committed to building real-world solutions to everyday problems. Seeking opportunities to apply technical expertise and problem-solving skills in a dynamic professional environment.

AREAS OF SPECIALIZATION

- Full-Stack Web and Mobile Development
- Backend Systems, Microservices and RESTful APIs
- Database-Driven Information Systems
- Network Administration and Information Security
- Secure, Scalable Software Design

EDUCATION

Bachelor of Science in ICT (BICT) — *Mzuzu University* Graduation pending

All four levels completed. Currently on industrial internship at Infi-Tech.

Relevant Coursework

Level One	
Semester One	**Semester Two**
End User Computing	PC Management and Maintenance
Programming in C	Multimedia
Computer Communication Technology	Computer Architecture and Organization
Communication Skills I	Communication Skills II
Pre-calculus	Calculus

Level Two	
Semester One	**Semester Two**
Operating Systems	Mobile App Development
Programming in Java	Human Computer Interaction
Computer Networks I	System Analysis and Design
Web Design	Database
Introduction to Statistical Analysis	Multivariate Calculus

Level Three	
Semester One	**Semester Two**
Research Methods	Group Project
Data Structures and Algorithms	Object Oriented Programming with C++
Computer Networks II	Object Oriented Analysis and Design
Web Programming	Project Management
Mobile Telecommunication	Distributed Systems

Level Four	
Semester One	**Semester Two**
Entrepreneurship	Artificial Intelligence(AI)
Network Administration and Information Security	Electronic Commerce
Software Engineering	Business Management
Modeling and Simulation	System Project
Information System Audit	

Malawi School Certificate of Education (MSCE) — *Kings Foundation Secondary School* 2016 – 2021

PROFESSIONAL EXPERIENCE

Full-Stack Developer (Intern) — *Infi-Tech* 2026 – Present

- Develop full-stack features for SaaS platforms, microservices and websites using Next.js, NestJS, Expo, PostgreSQL and Prisma.
- Design and build REST APIs consumed by web and mobile clients.
- Contribute to InfiSend, a messaging API platform that delivers SMS (via Africa's Talking) and email, and integrate WhatsApp Business as an additional chat channel.
- Containerize applications with Docker for consistent development and deployment environments.
- Apply security best practices throughout the development lifecycle, from design to deployment.

ACADEMIC AND PROJECT EXPERIENCE

Full-Stack Developer: 3D Learning Platform — *Final Year Project*

- Built a web-based learning platform that uses 3D models, primarily for Geography and Biology, to improve educational delivery and access in Malawian secondary schools.

Full-Stack Developer: Feedback Portal — *Multi-Tenant SaaS Platform*

- Developed a platform for collecting customer feedback, managing support tickets and monitoring customer satisfaction.
- Architected it as a set of NestJS microservices behind an API gateway, with separate Next.js frontends for tenants and platform administrators.

Developer: Mzuzu University ICT Weekend Timetabling System — *Group Project* 2025

- Helped build a web-based system that uses a genetic algorithm to generate optimized, conflict-free timetables for the ICT Weekend Programme.
- Replaced a manual scheduling process with automated, constraint-aware scheduling.

TECHNICAL SKILLS

Programming Languages	C, C++, Java, JavaScript, TypeScript, PHP, SQL, HTML and CSS.
Frameworks and Libraries	Next.js, NestJS, Expo, Laravel and Tailwind CSS.
Databases	MySQL, PostgreSQL and Prisma ORM.
Tools and Platforms	Docker and Cisco Packet Tracer.
Concepts	RESTful APIs, microservices, API gateways, multi-tenant SaaS, genetic algorithms and 3D modelling.
Networking and Security	Network fundamentals, network security and secure application development.

CERTIFICATIONS

- Network Security
- CCNA: Introduction to Networks
- Introduction to Cybersecurity
- CSS Essentials
- Career Essentials in Software Development

PERSONAL INTERESTS

Cybersecurity, artificial intelligence, computer networking, building real-world problem-solving software, gaming, and following sports and news.
